INTRODUCTION

USING THE DIRECTORY:

The Directory has two tables of contents and three indexes to assist the reader.

The first table of contents is a summary table providing the section headings only. This offers a brief overview of the contents. The second table of contents contains all major headings and, as such, provides the basic structure of military and military-related agencies of the Central Eurasian States. This should provide a guide for the reader who wishes to examine a given organization.

The three indexes are Roman alphabetical listings of the last names of the individuals cited. Index Number I covers individuals cited in the press since August of 1991. Index number II covers individuals for whom citations have not been entered in the directory since August of 1991. It should be noted that this distinction is not definitive. Many of the individuals for whom no new citations have been entered in the directory since August of 1991 may still hold the posts referred to. Index number III lists senior officers implicated in or removed from office following the August 1991 coup d'etat.

CONTENTS:

This directory grew out of previous JPRS Directories of the USSR Ministry of Defense. As such it is in transition, just as are the agencies to which it refers. CIS Agencies are listed first, followed by listings for each of the states and other entities which derived from the former Soviet Union. Autonomous entities such as Crimea or Dnestr are listed under the States in which they are located.

During the Summer of 1992 much of the new CIS Combined Staff structure was made known. It is to be much smaller than the old Soviet General Staff. Apparently, the majority of directorates and other organizations subordinate to the old USSR General Staff have been taken over by the Russian Ministry of Defense. Similarly, the Russian Federation and Ukraine are rapidly generating

their own Armed Forces and staff structures. Therefore, the Directory contains inaccuracies fostered by the rapid pace of change and the continued survival of some but not all former Soviet defense agencies. Agencies have been created, changed and dissolved within a short period of time. The reader should take particular note of the dates indicated in the source citations.

The structure and hierarchical order of the military agencies provided in this directory, are based on: 1) the position titles listed for officers in Central Eurasian media sources, unless otherwise indicated.

Where errors in translation from the Russian (or other language) have crept into English usage, and despite longstanding acceptance among Western readers, the Directory tries to translate terms as close to the proper original definition as possible. Thus "voyska" is rendered as "troops" throughout and the translation of "Raketnyye Voyska Strategicheskogo Naznacheniya" as "Strategic Rocket Forces", has been abandoned in favor of "Strategic Missile Troops", "Ground Forces" in favor of "Ground Troops", etc.

In-so-far as possible the Directory is organized on the basis of "administrative" rather than "operational" subordination. For example, troops of a military district are in fact administratively subordinate to that district. However, if the same troops were deployed for operational purposes they would come under the "operational subordination" of a combat command.

The Directory does not provide a complete listing of all personnel or organizations' structures.

If known, the next higher organization in a given hierarchy is listed to the right of the organization name, and is placed in square brackets, i.e. [...].

In order to preserve the integrity of the spelling of names, the Russian soft sign is indicated by the use of an apostrophe. The Russian hard sign is indicated by the use of double quotation marks. However, where the original source is in a language other than Russian, the spelling of the name may vary from the standard Russian transliteration.

Honors and awards have been excluded from both individual and organizational titles.

Capitalization is adjusted to standard English style.

Where ever possible, each entry provides a source and date in which the officer was FIRST NOTED in a given position, and the MOST RECENT source and date observed to have mentioned the officer. Where a date precedes a source, as in: "(27 Jul 90 in KVS 15/90 pp 46-62.)" the date is that on which the journal was signed to press.

Comments by the Editor are placed in square brackets, e.g. [...].

(Moscow RIA in English 1653 GMT 7 May 92). Subsequently, talks between Byelarus and the CIS, represented by Col-Gen P'yankov, led to an agreement transferring "---virtually all the military units of the Ground Troops and the PVO with the exception of several training centers--- 90 percent of the fighter-bomber force, an air transport regiment. ---The property at the Central Medical Depot is to be divided up on a percentage basis, while the fate of the Pinsk Naval Training Center will be the subject of a separate agreement. Byelarus does not intend to give up the entire technical base of this center, which served to train naval specialists of a lower level, since it can be utilized to prepare seamen for a merchant fleet, something which the republic is forming. Thus, remaining on the soil of Byelarus is a group of strategic forces under the command of the CIS Combined Armed Forces with a total strength of about 40,000 men. TEXT OF YELTSIN DECREE TAKING OVER BLACK SEA FLEET

PM0804152392 Moscow ROSSIYSKAYA GAZETA in Russian 9 Apr 92 First Edition p 1

[Decree No. 375 of the Russian Federation president "On the Transfer of the Black Sea Fleet to the Russian Federation's Jurisdiction," dated Moscow, the Kremlin, 7 April 1992 and signed by Russian Federation President B. Yeltsin]

[Text] For the purposes of maintaining steady control of the Black Sea Fleet and its combat readiness and ensuring social protection for servicemen and their families, appreciating its historical traditions, and in connection with the fleet's indeterminate status, I resolve that:

1. The Black Sea Fleet is to be transferred to the jurisdiction of the Russian Federation and subordinated to the commander in chief of the CIS Joint Armed Forces.

2. It is to be laid down that the activities of the Black Sea Fleet are financed out of the Russian Federation budget.

The Russian Federation Government is to provide for measures to ensure the social protection of Black Sea Fleet personnel.

3. The Russian Federation Foreign Ministry together with the Russian Federation Defense Ministry is to begin talks with Ukraine without delay with a view to determining conditions for basing ships and vessels of the Black Sea Fleet in Ukrainian ports and transferring some of them to the Ukrainian armed forces.

The historic Russian Andreyevskiy flag and pennants are to be flown on Black Sea Fleet ships and other vessels.

4. Black Sea Fleet ships are to perform combat service in strict accordance with the orders of the commander in chief of the CIS Joint Armed Forces.

[Signed] Russian Federation President B. Yeltsin

APPENDIX III: TEXT OF YELTSIN DECREE SETTING UP RUSSIAN ARMED FORCES

PM0805173992 Moscow ROSSIYSKAYA GAZETA in Russian 9 May 92 First Edition p 1

["Decree of Russian Federation President on the Creation of Russian Federation Armed Forces" dated 7 May 1992]

[Text] Guided by the Declaration on the Russian Federation's State Sovereignty and in accordance with the Russian Federation law "On Security," I ANNOUNCE the creation of Russian Federation Armed Forces.

In creating its own Armed Forces, the Russian Federation preserves and reaffirms:

the continuity of the best combat and heroic traditions of the Russian Army and the use of the Armed Forces to defend Russia's freedom and independence and to safeguard its security and sovereignty;

its commitments to carry out existing international treaties and agreements in the arms reduction and disarmament sphere, and it calls on the CIS states to conclude a collective security treaty.

The force generation of the Russian Federation Armed Forces will be based on the principles that military structures come under the control of supreme organs of state power; that the organizational structure and effective combat and numerical strength of the troops (forces) correspond to the concept of Russian security; that we will have a multinational cadre army staffed on the basis of a combination of draft military service and military service under contract; that there will be unity of command and permanent combat readiness; and that account will be taken of national historical traditions, the norms of international law, and world experience of military force generation.

Given the present-day stage of the development of the situation on the territories of the former union republics -- now sovereign states -- the Russian Federation's responsibility for the fulfillment of the functions laid upon it by the UN Charter, and the need to improve the security system within the CIS framework, I resolve that:

1. Organs of military administration, large strategic formations, combined units, other military units, institutions, organizations, and military training establishments of the former USSR Armed Forces located on Russian territory, as well as groupings of troops and naval forces outside the Russian Federation but under its jurisdiction shall be included in the Russian Federation Armed Forces.

The existing system for administering the Strategic Forces shall be maintained in accordance with previously adopted agreements. The strategic forces on Russian Federation territory are part of the CIS Joint Armed Forces. Corresponding forces and systems shall be allocated from the Russian Federation to the Joint Armed Forces High Command.

OFFICERS REMOVED FROM OFFICE FOLLOWING THE AUGUST 1991 COUP D'ETAT

2. On the basis of interstate talks the Russian Federation Foreign Ministry together with the Russian Federation Defense Ministry shall determine the status of the troops (forces) located on other states' territories and not forming part of their own Armed Forces or of the CIS Strategic Forces.

3. Prior to the adoption of corresponding Russian Federation acts of legislation on defense the leadership of the Russian Federation Armed Forces shall be assumed by the Russian Federation president as supreme commander in chief, while direct administration shall be the task of the Russian Federation first deputy defense minister.

With a view to preventing any weakening of the administration of the troops (forces) during the formation of central organs for the military administration of the Russian Federation Armed Forces, leadership of the troops (forces) shall be implemented via the structures of the former USSR Defense Ministry and Armed Forces General Staff.

4. During the force generation of the Armed Forces the Russian Federation Defense Ministry shall elaborate and submit proposals on:

the content of military reform in the Army and Navy;

the reduction of the effective combat and numerical strength of the Russian Federation Armed Forces, and on cuts in expenditure on pay [soderzhaniye] in light of the phased transition to a professional army;

measures to provide social and legal protection for servicemen, persons discharged from active military service, war and Armed Forces veterans, internationalist servicemen, and their family members;

the reorganization of the system for developing and purchasing arms and military hardware for the Russian Federation Armed Forces;

and the organization of reliable protection for strategically important installations on Russian Federation territory.

5. This decree enters into force from the moment it is signed.

[Signed] Russian Federation President B. Yeltsin

This is a U.S. Government publication. Its contents in no way represent the policies, views, or attitudes of the U.S. Government. Users of this publication may cite FBIS or JPRS provided they do so in a manner clearly identifying them as the secondary source.

Foreign Broadcast Information Service (FBIS) and Joint Publications Research Service (JPRS) publications contain political, military, economic, environmental, and sociological news, commentary, and other information, as well as scientific and technical data and reports. All information has been obtained from foreign radio and television broadcasts, news agency transmissions, newspapers, books, and periodicals. Items generally are processed from the first or best available sources. It should not be inferred that they have been disseminated only in the medium, in the language, or to the area indicated. Items from foreign language sources are translated; those from English-language sources are transcribed. Except for excluding certain diacritics, FBIS renders personal names and place-names in accordance with the romanization systems approved for U.S. Government publications by the U.S. Board of Geographic Names.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by FBIS/JPRS. Processing indicators such as [Text] or [Excerpts] in the first line of each item indicate how the information was processed from the original. Unfamiliar names rendered phonetically are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear from the original source but have been supplied as appropriate to the context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by the source. Passages in boldface or italics are as published.

SUBSCRIPTION/PROCUREMENT INFORMATION

JPRS publications, which include approximately 50 regional, worldwide, and topical reports, generally contain less time-sensitive information and are published periodically.
